

# The Best of Both Worlds

Translation, Technology and Human Expertise at your Service

Our translations are the final output of a long analytical process. Our team uses Translation Memory Managers (TMM), Terminology Management Systems (TMS) and Computer Assisted Translation (CAT) as a preamble to a thorough human linguistic work which critically analyzes the texts. Even the more advanced translation engines and tools cannot compete with human linguistic expertise and criteria in the composition of a translation document. We are familiarized with the different traditional and contemporary schools of translation and put that knowledge to work for your text.

**If you want a correct and clear translation or editing of your text, the work has to be done by linguists which control the language of your field.**

# NEURO-MORPHISM

## Scientific Translations and Editing for Physiotherapy

**Neuro-Morphism** is a team of bilingual professional translators, editors and proof-readers of English and Spanish that offers specialized services in Physiotherapy.

We translate, edit and proofread all sorts of physiotherapy texts such as academic papers, abstracts, reviews, theses and dissertations, research projects, books and book chapters, material for conferences and congresses, brochures, marketing material, and any other professional document. Our services include as well the translation and editing of reports, certificates, protocols, prospects, web pages, etc.

We translate your physiotherapy text from English into Spanish or from Spanish into English

We edit and proofread your physiotherapy text in English for its publication in English

We edit and proofread your physiotherapy text in Spanish for its publication in Spanish

Women's Health (Obstetrics and Gynecology)

# Services for clinical and research physiotherapy communities

In recent years, Physiotherapy has become a fully developed career, expanding its scope as well as its research potential. Its desire for evidence-based practice and high academic standards of excellence has been reflected in the increasing specialization and the institutionalization of PhD degrees. In order to fulfill these developments and acquire their place in the scientific community, Physiotherapists are urged to increase their level of publications and investigation. With this in mind, at **NEURO-MORPHISM** we have created a specialized area that focuses on translation and editing for Physiotherapy. We concentrate our skills to create a fully comprehensible, well-constructed and scientifically precise text that may enable Physiotherapists to reach international audiences and peers in English and/or Spanish with the highest possible proficiency.

CARDIOVASCULAR AND PULMONARY  
PHYSIOTHERAPY

### Veterinary PT

### HYDROTHERAPY

**NEURO-MORPHISM** offers services for Hospitals, Clinics, and Private PT practitioners who wish to minimize linguistic barriers with their clients/patients and who value the importance of accurate and clear communication.

A high standard of excellence is our goal and for this reason we struggle to provide the best possible service through a specialized team of experts, dedicated Physiotherapists and Linguists, who value the importance of this beautiful profession.

### NEUROLOGICAL PHYSIOTHERAPY

### SPORTS PHYSIOTHERAPY

### MANUAL THERAPY

## By Physiotherapists for Physiotherapists

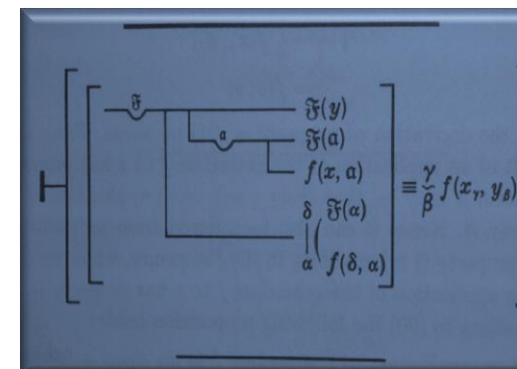

### PEDIATRICS

### Women's Health

### PSYCHIATRY

### Geriatrics

A scientific paper has to be clear and precise in its communication. Besides the more obvious proofreading of the text, orthography and general grammar, we offer a thorough revision of style and logical structure. Our style correction includes: semantic control of pronominal functions, redundancy reduction, subordinate sentence articulation and proper parallel constructions.

### Logical Editing

As an extra-service, we provide our texts with a revision of their logical structure and order in the argumentations, checking for unnoticed inconsistencies.

## Writing Solutions

### ABOUT US

We are an enthusiastic team of bilingual linguists, philosophers, medical science practitioners and writers committed to excellence and clarity in translations and editing.

Our team is directed by Oscar E. Munoz, Ph.D. by Princeton University (\*98) in Romance Languages and Literatures and Ph.D. in Philosophy by UNED (\*96), Madrid, an epistemologist, philosopher of language and logician which integrates the expertise required for the translation and editing of scientific texts.

Our area of physiotherapy is coordinated by Nur Ferrante, BSc, and MSc in Physiotherapy with more than fifteen years of clinical practice. She also holds a BA in English Linguistics and Literature, and works as editor and translator. These combined skills give her the necessary expertise for achieving excellence when working with Physiotherapy texts.
